## Team 17 - Seeded Defects Log

Case Wright, Pat Fortunato, Nicolas James, Evan Klein, Patrick Sullivan

Defect No.	Defect	Output Before Seeding	Output After Seeding	Suggested Correction	Severity
1	Blank questions without text can be added to quizzes	Blank questions will not be added at all	Blank questions will now be added	Add check to see if question text is empty and don't add question if it is	2
2	Upload slides button will upload even if no file is selected or title has been checked	Upload slides modal form will not submit unless all fields are valid	Upload slides modal will submit no matter what, possibly causing other errors (bad slides, etc.)	Add a check to make sure button is disabled if fields aren't valid	2
3	Logout button on profile page doesn't work	Will log out normally upon clicking the logout button	No longer logs out, output in console indicates a missing function error	Fix bad function name from 'logou()' to 'logout()'	3
4	Upon viewing	First slide	First slide	Modify the	3

	the first slide in a set of slides, the first one is always incorrectly sized	shows normally	shows incorrectly - badly sized	parameters of the viewing box	
5	Upon paging past the last slide, paging even more will continue to increment the page counter. The last slide will continue to show but upon paging back, users will have to click it multiple times to go back.	Slide will normally page back and forth, even at the last slide	Users can page past the last slide causing them to have to press the 'previous slide' button multiple times	Use slide length parameter and make a check in the slide increment function to determine if we go past the last page	3
6	Quizzes can be submitted with blank answers	Quiz will not submit with blank answers	Quiz will submit with blank answers	Disable submit button if answer is blank	2
7	Items that are not PDFs can be uploaded under slides even though it mandates PDFs	Only PDFs can be uploaded, other types will show an error	Other formats can be uploaded, causing a possible error	Show error if file format is invalid, don't let it through	2
8	'Create New Quiz' button shows up on class page even if user is not an admin	'Create new Quiz' button shows up on class page for only the students"	'Create New Quiz' button shows up on class page even if user is not an admin	Create or modify an ngIf in the html	2
9	"Take attendance" button is on a new row, when	All the buttons are on one row.	The "take attendance" button is on a new row,	Modify the CSS	3

	it should be in line with the quiz buttons.		when it should be in line with the quiz buttons.		
10	Clicking the “close attendance” button only closes the dialog, but not the attendance.	The button closes both the dialog and the attendance .	The button closes only the dialog when clicked.	Add a click attribute	2
11	User is not logged in after registering	User is logged in after they complete registration .	User is not logged in after they complete registration.	Check register-form.component.ts	2
12	The class attendance history dialog shows all of the dates instead of the just date selected.	Only the attendance history for the date selected is shown.	All of the attendance history is shown no matter the what date is selected.	Add an ngIf to to compare the selected date.	2
13	The textbox for leaving a question grows off the page with a large amount of text.	“Leave a question” textbox stops growing at a certain point and adds a scroll bar.	“Leave a question” textbox grows off the page.	Look for or add an if statement that limits the size of the textbox.	3
14	Clicking out of the attendance dialog in the proffesor view closes the dialog but not the attendance.	Clicking out of the attendance dialog closes it.	Clicking out of the attendance dialog does nothing.	Check the modalParams of the dialog.	2
15	When there are no questions in	Text is displayed	There is no text box	Check the html where	1

	the live question list the list should display "There are no questions for this course"	informing the user that there are no live questions.	displayed.	the text should be displayed.	
16	Click here to register button not opening register pop up.	Clicking the link switches the pop up from the login pop up to the register pop up.	Clicking the link does not change the pop up.	Check the html where the link is displayed.	3
17	When a user attempts to create an empty question the error popup does not appear.	Clicking the add question when the question textbox is empty should result in a alert pop saying no blank questions allowed.	Clicking the add question with an empty text box does not cause an alert to appear.	Check the functions that test for empty text inputs.	1
18	Marking a question as answered does not delete the question from the list.	Questions that were answered would be deleted from the list of unanswered questions.	Questions remain in the list after being answered.	Check the functions which handle questions that have been answered.	2
19	When submissions are being processed for	The score should be a whole number	The scores are calculated incorrectly.	Check the where questions are processed for	2

	their score, the score isn't correct	and the correct whole number		submission	
20	When viewing quiz results, the question text will not show up, just [Object, object]	Each quiz question text should be displaying	The text for the questions should be popping up	Check the html where the questions are being displayed	3
21	Calculates the average incorrectly when showing the last quiz for quizzes with more than one question	The average should be accurate for multi-question quizzes	The average is calculated multiple times and is added multiple times	Check the function in which the average is calculated	2
22	When there is an active quiz, the button to take the quiz is disabled and the user cannot take the quiz.	The button should be clickable to open the current quiz	The button is disabled when it shouldn't be	Look at the CSS and html in courses	2
23	When filling out a quiz, even if the user answers all of the questions, it will still be an invalid form.	If every question has an answered question, the quiz should submit without an alert.	If they have a valid form, the quiz won't submit.	Inspect the function that checks the quiz form to see if it's a valid form.	2
24	When someone tries to update their quiz results, the server throws a not-found	The quiz should close and update its score in the server	The server throws a 404 if the user tries to update their score.	Inspect the ruby controllers where the quiz updates	2
25	In view quizzes,	The	One of the	Inspect the	3

	the green highlighted answer is not the actual correct answer, it should be the one below it.	correct answer is highlighted in green	wrong answers is highlighted green	HTML where the quiz is rendered
